

Representation Letter

The accompanying description has been prepared by Adacor Hosting GmbH, Essen, for customers who have used the services “Complex/Enterprise Hosting, Cloud Hosting, Managed Services und Hosting Infrastructure” and their auditors who have a sufficient understanding to consider the description, along with other information including information about controls operated by customers themselves, when assessing the risks of material misstatements of customers’ financial statements.

The description indicates that certain control objectives specified in the description can be achieved only if complementary user entity controls contemplated in the design of Adacor Hosting GmbH’s controls are suitably designed and operating effectively, along with related controls at Adacor Hosting GmbH.

Adacor Hosting GmbH uses various sub-service organizations that provide housing (provision of data center premises), facility management, physical access security, fire protection, cooling and air-conditioning, power supply and UPS and cabling outside the premises leased by Adacor Hosting GmbH. The description includes only those control objectives and related controls of Adacor Hosting GmbH, and excludes control objectives and related controls of the subservice organizations described in the description (carve-out).

Adacor Hosting GmbH, Essen, confirms that:

1. The accompanying description fairly presents Adacor Hosting GmbH’s services “Complex/Enterprise Hosting, Cloud Hosting, Managed Services und Hosting Infrastructure” throughout the period January 1, 2025 through December 31, 2025. The criteria used in making this statement were that the accompanying description:
 - a. Presents how the system was designed and implemented, including:
 - ▶ The types of services provided, including, as appropriate, classes of transactions processed.
 - ▶ The procedures, within both information technology and manual systems, by which those transactions were initiated, recorded, processed, corrected as necessary, and transferred to the reports prepared for customers
 - ▶ The related accounting records, supporting information and specific accounts that were used to initiate, record, process and report transactions; this includes the correction of incorrect information and how information was transferred to the reports prepared for customers.

- ▶ How the system dealt with significant events and conditions, other than transactions.
 - ▶ The process used to prepare reports or other information provided to customers.
 - ▶ Relevant control objectives and controls designed to achieve those objectives.
 - ▶ Controls that we assumed, in the design of the system, would be implemented by user entities, and which, if necessary to achieve control objectives stated in the accompanying description, are identified in the description along with the specific control objectives that cannot be achieved by ourselves alone (Complementary User Entity Controls).
 - ▶ Other aspects of our control environment, risk assessment process, information system (including the related business processes) and communication, control activities and monitoring controls that were relevant to the services provided.
- b. Includes relevant details of changes to Adacor Hosting GmbH's system during the period January 1, 2025 through December 31, 2025.
- c. Does not omit or distort information relevant to the scope of the system, while acknowledging that the description is prepared to meet the common needs of a broad range of customers and their auditors, and may not, therefore, include every aspect of the system that each individual customer may consider important in its own particular environment.
2. The controls related to the control objectives stated in the accompanying description were suitably designed and operated effectively throughout the period January 1, 2025 through December 31, 2025. The criteria we used in making this assertion were that:
- a. The risks that threatened achievement of the control objectives stated in the description were identified;
 - b. The identified controls would, if operated as described, provide reasonable assurance that those risks did not prevent the stated control objectives from being achieved; and
 - c. The controls were consistently applied as designed, including that manual controls were applied by individuals who have the appropriate competence and authority, throughout the period January 1, 2025 through December 31, 2025.
3. Adacor Hosting GmbH has provided the service auditor ("BANSBACH GmbH Wirtschaftsprüfungsgesellschaft Steuerberatungsgesellschaft, Stuttgart", subsequently called „BANSBACH“) with
- a. Access to all information, such as records, documentation and other matters, including service level agreements, of which Adacor Hosting GmbH is aware that is relevant to the Description and the Assertion included in the ISAE 3402 Type 2 Report for the Period from January 1, 2025 through December 31, 2025;
 - b. Additional information that BANSBACH has requested from Adacor Hosting GmbH for the purpose of the assurance engagement; and

- c. Unrestricted access to persons within Adacor Hosting GmbH from whom BANSBACH determines it necessary to obtain evidence.
- 4. Adacor Hosting GmbH has disclosed to BANSBACH any of the following of which it is aware:
 - a. Non-compliance with laws and regulations, fraud, or uncorrected deviations attributable to Adacor that may affect one or more user entities;
 - b. Design deficiencies in controls;
 - c. Instances where controls have not operated as described; and
 - d. Any events subsequent to the period covered by the Description up to the date of BANSBACH's assurance report that could have a significant effect on BANSBACH's assurance report.
